

Pressure sensors for universal industrial applications

Pressure sensor OEM or industrial versions

Housing:	Stainless steel
Connection	G 1/4" or on request
Nominal pressure:	0 ... 100 mbar or 0 ... 600 bar
Output:	2 wire: 4...20 mA 3 wire: 0 ... 10V
Accuracy:	0,1% FSO to 0,5% FSO
E-connection:	Plug M 12 x 1

Our pressure sensors are characterized by excellent temperature behavior and good long-term stability. They are available in various customer-specific designs as well as in EX version available.

The compact design allows different combinations of process connections pressure ranges and electrical variants and can therefore cover almost all industrial applications.
